

The **Securamesh with Timber Infill** fence system provides a Medium level of security fence that is both aesthetically pleasing and an effective visual barrier. Our pressure treated timber is protected against rot and decay, making it ideal for withstanding harsh British weather. **Securamesh** is a welded mesh panel with horizontal triangular folds that help to form a strong, rigid fence line, particularly suitable for use around schools, public buildings, retail parks and business premises.

Posts, Clamp Bars & Fixings

The posts that Securafit security products offers along with the clips provides a fixing system allowing for variations whilst securing the panels. The system is easy to install and allows the panels to be stepped, helping the fence line follow the contours of the ground. With the vandal resistant security fixings this post and clip system provides a reasonable level of security to any boundary.

CAUTION—the fence is not designed to take any additional loads e.g. Nettings, Signs or persons climbing. Any/all could lead to damage/failure of the fencing system.

Longevity

The timber should be treated 1–3 years depending on levels of wear & tear + exposure¹ with an appropriate preservative—we recommend 'Stable Coat—Light Green' Wood Stain². All fixings should be bi-annually checked for damage, and tightening if required. Dirt, Dust and Debris should be regularly cleared from the bottom of the fence. Any undergrowth or weeds should be appropriately cleared from beneath the fence.

Finish

Panels and posts have been submitted to number of precoat processes, are galvanised to BS EN ISO 1461 and can polyester power coated to BS EN ISO 13438. All fixings are fully galvanised.

Vertical infill typically is, 17 x 43 PAR S/F Whitewood *P2 Green Treated cross cut to required height.

Horizontal rails are, 45 x 45 PAR S/F Whitewood *P2 Green Treated cross cut to required length.

1—discretion advised: check condition of timber regularly - coats may be need to be applied more frequently

2—can be purchased from www.protekwoodstain.co.uk
